SUMMARY

Self-taught software developer focused on Flutter/Dart mobile development, backed by full-stack experience across Node.js, Laravel/PHP, and MySQL. Builds apps with Clean Architecture and GetX, with real-time features via Socket.io and hands-on embedded systems work (Arduino, ESP32, Raspberry Pi).

SKILLS

Mobile: Flutter, Dart, GetX, Clean Architecture, Hive, Shared Preferences

Backend: Node.js, Express, Laravel, PHP, REST APIs, JWT Auth, Socket.io

Data: MySQL, Supabase

Languages / Tools: JavaScript, SQL, Git

Embedded: Arduino, ESP32, Raspberry Pi

PROJECTS

SSociety | School Society | *Flutter, Node.js, Express, Socket.io, MySQL, JWT*

- Role-based school collaboration app (student / admin / manager) with a Flutter/GetX client and a Node.js/Express backend.
- Real-time features built with Socket.io; Clean Architecture client with offline sync.
- [View project](#)

Notes Application | *Flutter, Hive, Laravel*

- Cross-platform notes app supporting online and offline modes, with local storage via Hive and a Laravel REST API backend.
- [View project](#)

Portfolio Website | *HTML, CSS, JavaScript*

- Personal site built from scratch with no frontend framework — dark/light theming, lazy-loaded images, and scroll-based animations.
